Energy Efficiency Policy

1. **Objective**

It is an important part of our business operation to implement efficient energy management. This document aims at the ecological and economic impact of our business and works towards being a responsible global organisation by implementing actions for energy efficiency. This policy defines the framework for energy efficiency at KFinTech.

2. **Scope**

This policy shall apply to all establishments of KFinTech, and each employee shall be made a partner in implementing the policy.

3. **Date of Commencement**

This policy will be effective from 3rd, Jan 2022

4. **Policy**

KFin Technologies Limited (“KFinTech”) makes continuous efforts to optimise energy consumption by implementing various energy efficiency steps. KFinTech encourages involvement of all stakeholders and ensures that the policy is well communicated, implemented, monitored and reviewed periodically.

KFinTech's shall endeavor to reduce energy consumption through a variety of actions, namely,

- Monitor and reduce energy consumption.
- Manage and improve energy performance and energy efficiency.
- Increase the use of renewable energy and explore emerging no-carbon or low-carbon energy sources.

Energy Efficiency Policy

- Improve the energy efficiency of both centralised and distributed IT infrastructure; incorporate energy and environmental considerations into the design of new systems, solutions, and operating models
- Encourage the use of advanced technological equipment with high energy efficiency.
- Increase stakeholders awareness of energy efficiency.
- Incorporate an IoT-based smart controller to reduce energy costs.
- Promoting Variable Refrigerant Volume/Variable Refrigerant Flow technology for cooling systems and facilities.

This policy will be reviewed annually or as and when required. The effectiveness of the policy will be checked during the governance reviews.
